Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 13 is rejected under 35 U.S.C. 102(b) as being anticipated Kimura et al (EP 866101).

Kimura et al teaches an aqueous composition containing a photocatalyst (titanium dioxide) in a particle size of 5-40 nm. See page 3, lines 39-47; page 4, line 10; page 7, line 4).

Allowable Subject Matter

3. Claims 15-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: As to claim 15, Kimura et al teaches a photocatalyst concentration of 0.5-10% (5000-100000 ppm). There is no teaching or suggestion to reduce the concentration of photocatalyst to 1-100 ppm, and indeed it is doubtful that the coating of composition of Kimura et al would be capable of coating properly with such a reduced concentration of photocatalyst. With respect to claims 16 and 17, Kimura et al is silent to both sodium chloride and an oxidizing agent in the composition. Claims 18-20 are dependent upon claim 17.

5. Claims 1-12 are allowed, as set forth in the previous office action.
